

# Design

Lark Technology can offer a comprehensive electrical design service.

Lark Technology's knowledge and experience in the many disciplines associated with turnkey electrical projects ensures that all aspects of a project are considered in the design phase.

Lark's team of design / project engineers are able to draw on the experiences of our panel builders, installation engineers and software engineers to ensure project design is constantly monitored and improved.

Whether designing bespoke systems or small batch production units, Lark have experience in projects of all sizes.

Working in the food, pharmaceutical, water and utilities industries gives us a wealth of experience of industry specific requirements.

At the heart of any design is safety, quality and value for money.

All necessary standards are adhered to, from European directives EN 60204 and when needed ATEX directives, and incorporating customer specific standards where required.

If you have design requirements of any size or complexity, contact us at the above address.

## Lark Technology

- Project Design & Management
- Motor Control Centres
- Custom Built Panels
- PLC & SCADA Systems
- Instrumentation & IS Systems

## Lark Installations

- HV Installations
- Industrial Cabling & Installation
- Commercial Cabling & Installation
- Fire alarms
- Emergency Lighting
- Data Installation
- Inspection & Testing

## Coating Systems

- Bespoke Pharmaceutica Production Plants
- Organic & Aqueous Spray Systems
- Process Technology & Validation
