

# Panels

Lark Technology has been building and supplying panels to the food, pharmaceutical, water and utilities industries for many years.

Panels can be produced in all shapes and sizes, using off the shelf enclosures, standard modular panel construction or specialist stainless steel fabrication matching specific customer requirements.

We can supply panels designed to incorporate a range of your preferred make of industry-recognised components that have the highest standards for reliability and functionality.

The following types of panel can be supplied:- L.V. Power Distribution, Motor Control Centres, PLC control sections and operator control stations. Additionally, panels can incorporate pneumatic controls as part of a complete solution.

All panels are fully documented and tested before dispatch.

For all your panel needs give Lark Technology a call.
