

Software

Lark Technology has an experienced software development team working on a number of platforms, new and old, and specialising in the supply of systems to meet customer user requirements.

Lark Technology is a Mitsubishi partner, but also works extensively with other manufacturer's equipment, including Allen Bradley, Siemens, Alspa, Gem80 and Telemecanique.

We can supply systems ranging from standalone PLC and HMI through to networked integrated Supervisory Control And Data Acquisition (SCADA) systems.

Working in the food, pharmaceutical, water and utilities industries we can supply software compliant to the relevant standard for the particular industry.

With fully documented traceability for the design and development of software, we work within internal management systems (ISO9001) for the creation and maintenance of code.

Maintenance and site or remote support of equipment is available and often reduces cost.

If you have any requirements for software development or require support of existing equipment, please contact us at the above address.

Lark Technology

- Project Design & Management
- Motor Control Centres
- Custom Built Panels
- PLC & SCADA Systems
- Instrumentation & IS Systems

Lark Installations

- HV Installations
- Industrial Cabling & Installation
- Commercial Cabling & Installation
- Fire alarms
- Emergency Lighting
- Data Installation
- Inspection & Testing

Coating Systems

- Bespoke Pharmaceutica Production Plants
- Organic & Aqueous Spray Systems
- Process Technology & Validation
